Project Name	Personalized Networking Assistant
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

Purpose:

- ☐ Solve complex problems in a way that fits the state of your customers.
- ☐ Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- ☐ Sharpen your communication and marketing strategy with the right triggers and messaging.
- ☐ Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- ☐ **Understand the existing situation in order to improve it for your target group.**

Template:

1. CUSTOMER SEGMENT(S) Who is your customer? (e.g. wedding planners of 30-40 yrs. olds)	6. CUSTOMER CONSTRAINTS What constraints prevent your customers from taking action or limit their choices of solutions? (e.g. spending power, budget, no cash, network connectivity, available devices)	5. AVAILABLE SOLUTIONS Which solutions are available to the customers when they face the problem or need to get the job done? What have they tried in the past? What price & cost do these solutions have? (e.g. pen-and-paper vs an alternative to digital networking)
3. JOBS-TO-BE-DONE / PROBLEMS Which jobs-to-be-done (or problems) do you address for your customer? There could be more than one require different skills.	9. PROBLEM ROOT CAUSE What is the real reason that this problem exists? What is the back story behind the need to do this job? (e.g. customers have to do it because of the change in regulations)	7. BEHAVIOUR What does your customer do to address the problem and get the job done? (e.g. directly-related: find the right online portal/installer; calculate usage and benefits; indirectly associated: customers spend time time on understanding work (e.g. Greenpeace))
3. TRIGGERS What triggers customers to act? (e.g. seeing their neighbour installing solar panels, reading about a more efficient solution in the news)	10. YOUR SOLUTION If you are working on an existing business, write down your current solution first, fit it to the canvas, and check how much it fits really. If you are working on a new business proposition, then design it from scratch to fit to the customer and make up with a solution that fits within customer limitations, address a problem and matches customer behaviour.	8. CHANNELS OF BEHAVIOUR 8.1 ONLINE Mechanisms of actions do customers take online? Extract online channels from BT 8.2 OFFLINE Mechanisms of actions do customers take offline? Extract offline channels from BT and use them for customer development.
4. EMOTIONS: BEFORE / AFTER How do customers feel when they have a problem or a job and afterwards? (e.g. feel, insecure – confident, in control – ease if in your communication strategy & design)
